

Spaghetti Cotton Pebble

The design of little pebbles which are made of the soft fabrics, made them look like pebbles but have a good hand when touched, the background represented the lawn, reminiscent of the walk-way in the garden.

BUA BHAT FACTORY LTD., PART.

Bua Bhat Factory has been the manufacture and exporter of eco-friendly, handmade home furnishings products since 1987. Our products are made with the selva edges from garment factories. They are "up-cycled" into original art pieces for the home. In this way we are helping to solve the textile waste problem from industrial factories in Thailand. The waste water from the production process at Bua Bhat meets the standard for Thailand industrial specification.

Bua Bhat Factory's emphasis has always been on unique design and strict quality control. We have over 20 years experience in the handmade home furnishings business. All of our products are made by local women who live close by the factory. This allows them to earn money while remaining at home. In this way we are helping to maintain the local village lifestyle. We have become an important part of the society in the village we are located in, and also a source of work and income from abroad.

All of the staff at Bua Bhat enjoys working in a factory that is surrounded by nature.
